

Lycopersicon species

- 92863 - *L. esculentum* - Manchuria. Holds fruit well -- clean foliage.
- 124039 - *L. pimpinellifolium* - Peru. Has clean foliage.
- 126441 - *L. peruvianum* - Peru. Has clean foliage.
- 126915 - *L. esculentum* x *L. pimpinellifolium* - Peru. Has resistance to *Fusarium* race 2.
- 127827 - *L. hirsutum* - Peru. Has Tobacco Etch Virus resistance.
- 128244 - *L. esculentum* - Bolivia. Has anthracnose resistance.
- 129021 - *L. esculentum* - Ecuador. Used in breeding program for its anthracnose resistance.
- 129098 - *L. esculentum* - Colombia. Used in breeding program for its anthracnose resistance.
- 211839 - *L. pimpinellifolium* - Peru. Has anthracnose and early blight resistance.
- 223306 - *L. esculentum* - US, Rhode Island. Has compact vine, good fruit size and crack resistance.
- 255849 - *L. esculentum* - Italy. Being used in breeding program for its concentrated plant type, round fruit of good quality, small fruit with very small scar and core, fair fruit concentration and good crack resistance. *NC 7 1971 From APC p26-27*
- 255855 - *L. esculentum* - Italy. Good germination and cold tolerance.
- 262929 - *L. esculentum* - USSR. Early, concentrated fruit set.
- 262932 - *L. esculentum* - USSR. Early dwarf, attractive fruit.
- 262939 - *L. esculentum* - USSR. Early dwarf, attractive fruit that holds well.
- 270442 - *L. pimpinellifolium* - Mexico. Has high solids.
- 272735 - *L. esculentum* - El Salvador. Has crack resistance and fruit holds well.
- 272751 - *L. esculentum* - El Salvador. A midseason plum, small scar and core.
- 272945 - *L. esculentum* - El Salvador. Late, attractive fruit.
- 273011 - *L. esculentum* - Guatemala. Midseason to late, attractive pear.
- 273444 - *L. esculentum* - US, Oklahoma. Shows good fruit quality. Being used in a breeding program, has good set and concentrated ripening, segregating for fruit shape, small fruits with very small scar and core.
- 280592 - *L. esculentum* - USSR. Dwarf, good fruit size.
- 280593 - *L. esculentum* - USSR. Small vine, good fruit size. *NC 7 1971 From APC p26-27*
- 280597 - *L. esculentum* - USSR - 'Maliutka'. Good set and concentration, small scar and core.
- 280598 - *L. esculentum* - USSR - 'Voshod'. Small vine, good set, medium fruit size.
- 280599 - *L. esculentum* - USSR. Dwarf, attractive fruit.
- 285132 - *L. esculentum* - US, Oklahoma. Good set, fruit does not hold.
- 304224 - *L. esculentum* - USA. Good vine and fruit but crack susceptible.
- 304249 - *L. esculentum* - USA. Good plant type -- Hardin's miniature.
- 309693 - *L. esculentum* - Mexico. San Marzano type but severe cracking.
- 309916 - *L. esculentum* - Guatemala. Paste type, cracks and does not hold.
- 340905 - *L. esculentum* - Canada. Bacterial canker resistant.
- 341984 - *L. esculentum* - US, Rhode Island. Germination cold tolerance.
- 341988 - *L. esculentum* - US, Rhode Island. Germination cold tolerance.
