The problem is that the underlying report that the packing list grabs data from ONLY has the inventory standard default distribution form. It has no way to 'see' the order item distribution form and 'honor' when an item is shipped as a non-default form type.

I remember discussing this with Pete last year. Not sure if a trac ticket was actually submitted though – I can't find one. (Lisa, I can submit one if you would like)

– it was fixed in the OW in Trac #2252 but that's not the same as the packing list report dataview
#2252 (Modify the OW so that it honors the selected inventory lot form when updating an order) – GrinGlobal (ars-grin.gov)

The Amount seems to be coming from the standard distribution form in the inventory and not within the order. I knw this because I changed the Standard DI form and it changed on the packing list. The amount on the packing list should come from the Units shipped and the distribution form in the OW.

Trying to print "Packing-General" for Order #344485 and it's indicating the amount as "1 pkt SD" in the packing list when I clearly have either LV or HE selected. Why is it putting SD in there?

Item	Accession	Inventory	Plant Name	Viability	Amount
13	Non NPGS	NC7 PL	182-4		1 pkt SD
