Subject:	Historics Inactive Unavailable Seasonally Unavailable....
Date:	Monday, April 24, 2017 9:28:00 AM

I was answering a Contact Us message this morning, which did not have anything to do with the following example specifically, but as I was answering the question, I came across the following as I was looking for a historic accession.

If something is historic, shouldn't a user be able to just indicate that, and not also need to indincate that the accession is inactive? Doesn't historic imply inactive?
