Kurt,

There is a report on the pw that was developed later, but it isn't correct either. I don't know where the info is coming from that presents that data. If I use NC7 as the site, this is all that I get. Where is Reitsma, Carstens, Brenner, Millard?

Name	Value
site	nc7

Limit

1000

The report on the CT under reports used to be more correct, but it too is off in another way. It is under reports in the CT. Here is an image of how I bring it up. Another nice thing about it I can use it to figure out where these other new users are located…at least I was able to until

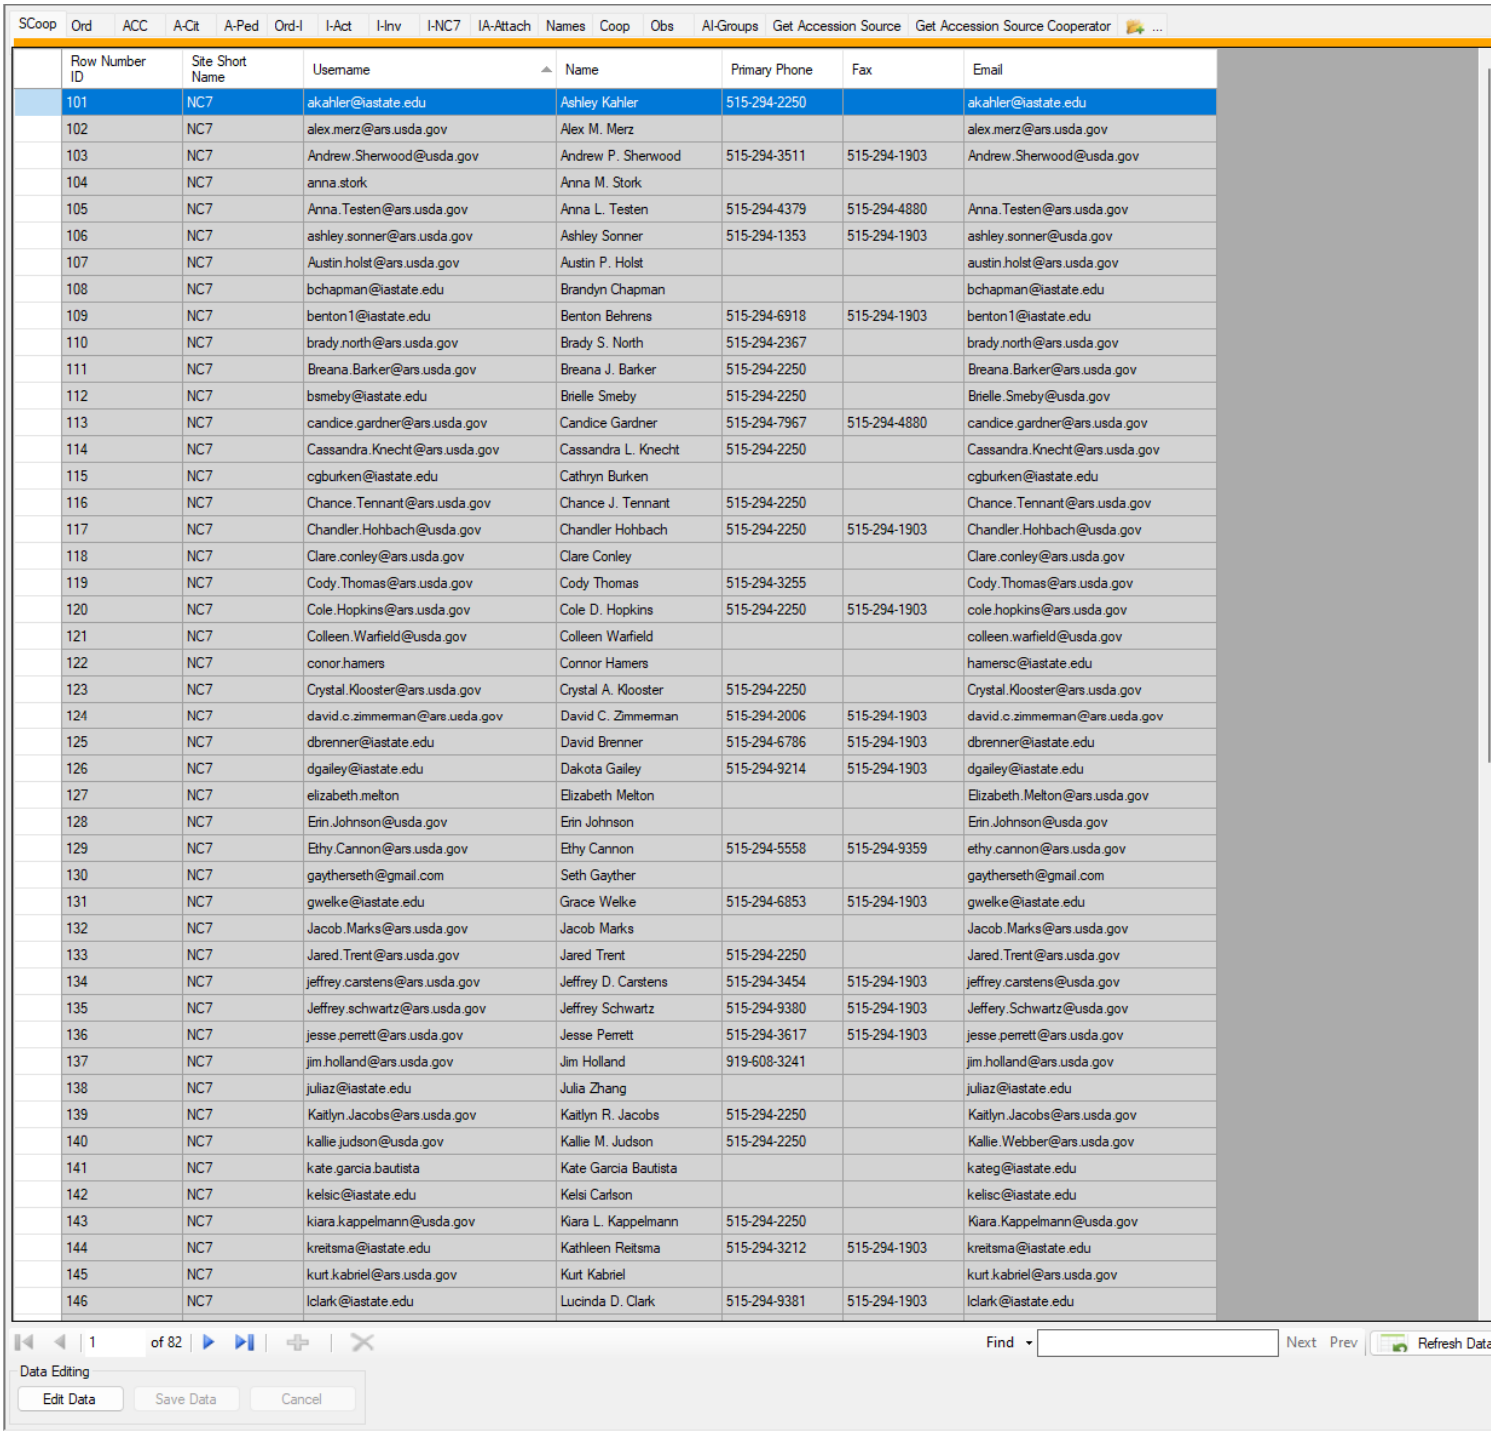

A current filtered view for site NC7 gives 82 users. It would be helpful to me and I believe to Lisa to have a current list of active NC7 users. A combination of the two reports for the CT would be good as well as one for the PW. Since the PW only filters by site, if a user does not know anything about someone except a name, a query based on a portion of the name would be nice or an option to list all users.

Here is the presentation of a portion of the 82 users (wrong) filtered to NC7. Besides a lastname, firstname column, a projected login expiration of their login would be helpful.

Sorry if I have more to add on this ticket, ticket writers have to be extremely patient on whatever they ask. I'm sure the developers feel the same way waiting on them to be more specific. I'll post a pdf copy of this to trac.

MJM

Comment:

The PW report "Users at a Site" already has a column composed of last name comma first name. What do you mean by the "user list report"?
