**Categories:** 00 0 Moved

Karen,

I found what the frequency asterisk thing was all about. Before we had the % sign in, there was a question as to what the 100,85,80 meant. You must have had a footnote somewhere as to what the asterisk meant. I'll defer to Marty as to whether the public still needs to be educated as to what these % values mean. If still needed, perhaps an asterisk on the trait title would be more appropriate, but you will still need to place on the page somewhere what the asterisk means.

As I was writing this I found that the asterisk indicator actually is on the descriptor display, but you have to analyze the page to find it. I have suggested another possible alternate if you remove the asterisk from each % value. Again I'll leave it to others to speak up if they think an explanation of the % is needed.

**Subject:** frequency

Sometimes you just have to look at things 100 different ways before one that'll work comes to you, assuming this will work for you.
I added code so if the frequency is not null, it puts it in () with a * and above the table it shows that it means frequency. I also ordered it by frequency, instead of by accession. This is only on my box at this time.
Since frequency isn't used by some sites, trying to put it as a query option doesn't seem very feasible.

(*Indicates frequency)

Show/hide columns | Show 10 rows | Excel | CSV | Search:

Showing 1 to 10 of 1,057 entries

| | ACCESSION | NAME | TAXONOMY | ORIGIN | AVAILABILITY | KERNEL COLOR |
|---|---|---|---|---|---|---|
| ☐ | PI 340841 | B-15 DENT STERILE | *Zea mays* L. subsp. *mays* | Iowa, United States | | BLUE (100*) |
| ☐ | Ames 21956 | Black Beauty Popcorn | *Zea mays* L. subsp. *mays* | Illinois, United States | | BLUE (100*) |
| ☐ | PI 553054 | 'OC1' | *Zea mays* L. subsp. *mays* | Iowa, United States | | BLUE (100*) |

There are some though, that have multiple frequencies.
