Subject: Re: new WOR e-mail format

Actually, no Laura. I removed taxonomy name so that the name can be formatted correctly in the c# code. The table would have to be resorted after the taxonomy is formatted.

Subject: RE: new WOR e-mail format

Harold:

there is an oversight in the dataview (the sort on name is missing now) which caused this new problem.

It worked OKbefore, and can be fixed easily by adding the 'name' back to the dataviw again.

Laura

Subject: new WOR e-mail format

I like the new WOR e-mail that we receive that includes the Name column. However, one thing, it would be nice if there is also a sort for taxonomy within site – it is sorting them by site and accession number.

Subject: Adding new columns to the Maintenace policy

I would like to request adding two columns to the inventory Maintenace Policy dataview. Currently the viability critical information is held in a text field which makes it not that useful. Are there any other collection level columns that would be useful to add?
